

CP-SCALE-AU-L002 · 0-900 s observed search progress

Lines are observed feasible incumbents through 900 s; eligible new traces are separate 40-run cohorts. Open diamonds are frozen final-only values.
Frozen FJ/FastWVC diamonds at 900 s mark budget end, not measured attainment; CHILS uses measured native best time and GWMIN measured completion.
CHILS/FJ outer offsets are lower bounds, so only native curves appear; FastWVC 900 s scores use its conservative outer upper panel. Panel y scales differ.
